Chestatee Regional Library System (CRLS) is pleased to announce that we are beginning a Laptop Lending Program. This means that all three branches of the library system—Lumpkin County Library, Dawson County Library, and the Dawson Satellite Library will have a limited number of Chromebook laptop computers available for library patrons to check out from the library. The Chrome Books will be equipped with wireless connectivity, so patrons will be able to use them wherever there is Wi-Fi access. Patrons must be at least eighteen in order to check the laptops out, but younger students are encouraged to use the laptops for homework, research, etc. The ChromeBooks check out for two weeks with a valid PINES library card from either Lumpkin or Dawson Counties. Funds for this exciting program were provided through the Institute of Museum and Library Services and Georgia Public library Service.
