What is scratch? It is a visual coding language designed specifically for children that allows them to create digital stories, games, and animations.

Coding for Kids!

Dates: June 6-9 and June 13-16 (two week long course)

Time: 4:00 – 5:00 p.m. each day

This class will be taught by Ray Li, a rising 9th grader.

Open to rising 3rd – 8th graders. No previous coding experience required. Participants should have basic keyboarding skills and a basic knowledge of computers. Registration required. Parents will need to sign a permission form for their child.
